## RB3D

### PRESENTATION / KNOW-HOW

Facing a strong growth in occupational diseases in the industry, RB3D offers **innovations in order to reduce the Musculo Squeletal Disorder (MSD) risks.**

Specific work place improvement, smart tools, collaborative robots (cobots), these are RB3D main ways to assist people at work with strength and gesture support solutions.

RB3D always put people in heart of the projects and uses mechatronics to ease them with gesture and strength assistance.
