## PRESENTATION / KNOW-HOW

METRON, a French CleanTech founded in 2013, is an expert in energy efficiency and industrial performance improvement, reduces energy costs and carbon footprint of companies. Our ambition? Digitize energy to decarbonize territories. Combining the digitization of data and human expertise with the computing power of Data Science, METRONEVA® SUITE brings the transparency necessary for manufacturers to standardize, operate and measure their energy performance strategy across their group's facilities.

Through its 9 subsidiaries in EMEA, APAC and LATAM, supported by nearly 150 employees, METRON supports the greening of 100 international industrial groups throughout the evolution of their digital maturity, such as Danone (200 sites), ArcelorMittal, SGD Pharma, Imerys.

The company has joined the 2020 and 2021 rankings of the "CleanTech 100" (San Francisco) and has been awarded by Bloomberg NEF in NewYork in 2019.

The METRONEVA® solution has also received the "Solar Impulse Efficient Solution for the World" certification. In order to support industrial groups in the creation of energy optimized factories, METRON has developed METRON Suite®. This Operational Energy Management System (Operational EMS) digitizes and integrates industrial data into a within a unique technology combining the expertise of energy engineers and the computing power of Data Science algorithms.

Concrete results: controlled energy consumption, constant reduction of the carbon footprint, and strong team commitment. METRON Suite® consists of a SaaS platform, METRON Factory®, a Data Science module ENERGYLAB and a corporate solution METRON Enterprise®.

## MARKETED PRODUCTS

Energy saving, environmental protection, occupational safety, fire prevention and air-conditioning
