SERIMATEC SN

PRESENTATION / KNOW-HOW

SERIMATEC has specialised in automation, computer-integrated material handling, standard or customised robotisation since 1977. This company manufactures handling facilities for different products, in all sectors of industry. One of SERIMATEC's strong points is its capacity to adapt to customers' needs, from standard products to special applications: conveyors, elevators, dynamic storage systems, handling devices, palletising systems, machinery loading/unloading systems, robotic cells, shuttles.
