BALYO

PRESENTATION / KNOW-HOW

BALYO designs, manufactures and markets robotic handling solutions for the manufacturing and logistics sectors. The company's innovative solution is revolutionizing the material-handling world. The technology can be found throughout Europe and is now available in North America, through BALYO Inc.

Its expert teams help customers, leverage the technology, integrate the solution, reduce costs, and achieve superior returns. From the identification of potential productivity gains to the design of optimum processes and their implementation, BALYO partners with its customers for maximum benefit.

In 2015, BALYO signed an exclusive agreement with FENWICK-LINDE to create, develop and market together, revolutionary material handling robots.

Fabien Bardinnet, BALYO CEO :

"Linde MH is the European market leader in industrial trucks in Europe and comprises great product knowledge and a very densely knit consulting and service network. For us, they are the ideal partner to create the most advanced robots to serve best our common customers."

Christophe Lautray, LINDE CSO :

"Our aim is to extend our range of automated industrial trucks and to offer our customers solutions having different levels of complexity. With BALYO we were able to persuade the technology leader in robotics for materials handling equipment to cooperate exclusively with us so that we can now combine the best of both worlds."
