ONE-TOO

PRESENTATION / KNOW-HOW

ONE-TOO is a **designer-manufacturer** of solutions for all the transport industries. Originally from the automobile sector, the company has a team made up of people who have a passion for the ongoing **search for useful innovations** and responses suited to the needs of users.

For over 40 years, **in partnership with the largest constructors and equipment makers in the automobile industry**, ONE-TOO offers innovative solutions in acquisition, evaluation and the characterisation of physical scales.

With products such as USBi, Moment Alpha and Amédée, the company has won customers over in the long term. **Particular experts in the control of measurements**, One-Too teams see innovation from the prism of global service.

ONE-TOO presents itself as the sole interlocutor, thanks to its position and experience which gives it a systematic view of each project, and allows it to be present at each stage :

Concept/ Research/ design Modelling Prototyping/ Tests Production Related services: installation, commissioning, training, after sales service
