#### **NEW AND KEY PRODUCTS**

**Smart & Synchronized** is the solution that enables to design and produce equipment integrating more and more software, electrical and electronic components.

This solution gives to engineers from different disciplines the possibility to work together on a common platform in an integrated manner.

Thanks to **Smart and Synchronized**, companies can synchronize all participating engineering disciplines on a single collaborative platform, and ensure full traceability from needs identification to product validation.

## MAIN CUSTOMERS

CLAAS - RIELLO - MASCHIO - JAKOB - MULLER
