CP3I

PRESENTATION / KNOW-HOW

CP3I is your partner in mastering your production tool. To do so, the company developed centers of excellence : Industrial IT and Computer Numerical Control. Industrial IT center includes custom development and industrial software package adaptation.

CP3I offers an individual support to its customers based on an expert team. Today, CP3I combines the best of both excellence centers in its HiTeam! solution to help you regaining control over your production tool.

NEW AND KEY PRODUCTS

MyHiTeam software package is a "Factory of the Future" solution collecting your machine-tool stock controls data as a whole. Then, thanks to its powerful discriminating algorithms, it transcribes in a simplified and faithful form machines health status.

Smart DEvice belongs to HiTeam: solution. It includes a box and a control display. It sensors transfer in real-time several machine tool criteria (temperature, humidity, vibrations/shocks, consumption of electricity) measure into myhiteam software.
