3E FRANCE

PRESENTATION / KNOW-HOW

For many years 3E has been intensely engaged with **comprehensive IT solutions** and therefore was the first to introduce ERP solutions for **window and door manufacturers** to the market. During the past years 3E developed from a German regional software company to an international solution provider with more than 85 employees and subsidiaries in Switzerland, Austria, France, Russia, China and the USA.

Permanent development, employment of leading technologies and **high customer focus** will ensure that in the future even more companies will be working successfully with 3E solutions.

3E-LOOK... just fits. 3E is continually working to improve and enhance functionalities in 3E-LOOK. In this way even smaller companies can benefit from the advantages provided by comprehensive software solutions.

MARKETED PRODUCTS

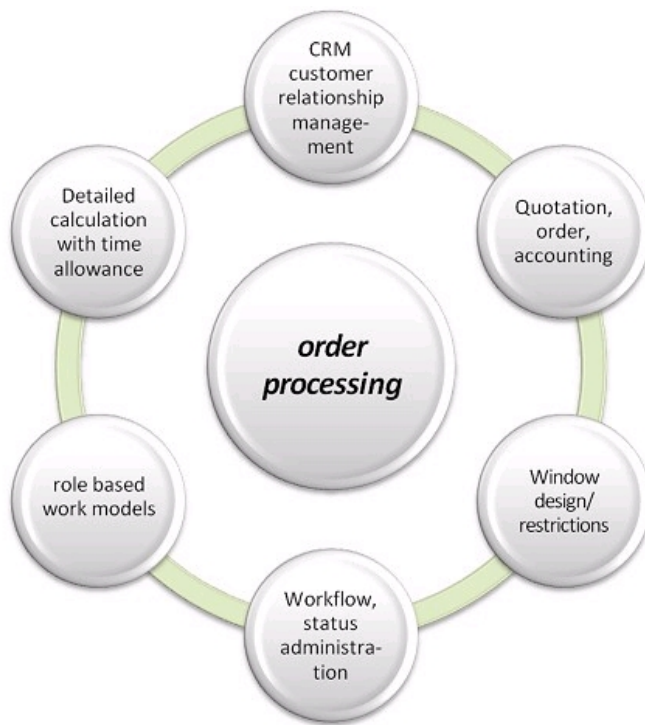

Independent computer software (CAD, ERP, production planning and control, etc.)
