FIDIA

PRESENTATION / KNOW-HOW

FIDIA is a Italian Group founded in 1974, who develops, manufactures and sells **Numerical Controls, Drives and High-Speed Milling Machines** in 3 or 5 axis mainly for the automotive in the moulds & dies sector , aerospace and energy sectors for the milling of complex surfaces.

FIDIA produces several type of high speed machines in 5 axis with tilting table or continuous bi-rotary head with spindle high power and the new GTF Gantry line with performances in aerospace applications.

Differentiated by size, architecture, and application, every FIDIA milling systems is located at the top end of the high-speed market in terms of performance.

High-speed milling is an important technological innovation and FIDIA develops softwares Himill a CAM and ViMill a Look Ahead virtual milling.
