## CONTACT INFORMATION

Eric COQUAND  
Process & windenergy key-account  
manager

## other manufacturing & business plants :

ACOEM France - Lyon and Paris  
ACOEM India, ACOEM Malaysia  
ACOEM Sweden - ACOEM GmbH  
ACOEM Brazil

## KEY FIGURES

Turnover (2017) : 87 M€  
part of the turnover on the export  
(market) (2017) : 50%  
Employees : 670

Equipment categories  
Measurement & control /  
Machinery for the paper and  
board industry

# ACOEM

## PRESENTATION / KNOW-HOW

In today's fast-moving world, the environment is increasingly impacted. The ACOEM Group is committed to sustainable development and help companies and public authorities limit their environmental impact by offering products and services that:

- Prevent and control air, noise and vibration pollution
- Increase the productivity and reliability of industrial machinery
- Contribute to the development of effective, robust & noiseless products
- Protect soldiers, sites and vehicles in military theaters of operation

Across the world, ACOEM's 670 employees innovate in the measurement, analysis and control of all environmental parameters through the 01dB, ECOTECH, ONEPROD, FIXTURLASER, MEAX and METRAVIB brands.

**ONEPROD** is a range of equipment and **condition monitoring** services for the industrial and energy sectors, ensuring that production facilities are maintained operational at the lowest cost.

The **ONEPROD** range also included data acquisition and processing solutions via simple and effective web interfaces, enabling operational staff to focus on their jobs and decision-making.

# Productivity and reliability of industrial processes

ACOEM

ONEPROD EAGLE: ONLINE WIRELESS SENSOR

ONEPROD FALCON: SMART DATA COLLECTOR

ONEPROD MVX: ONLINE CONDITION MONITORING SYSTEM

## NEW AND KEY PRODUCTS

**EAGLE** is a continuous monitoring system for rotating machinery, using wireless sensors. **EAGLE** makes it possible to monitor inaccessible or isolated machines, and considerably reduces installation costs.

**FALCON** is an innovative tool for collection, vibration analysis and balancing that puts condition-based maintenance within the grasp of all users. Fast, efficient and smart, **FALCON** was designed to meet the real-time productivity needs of industry. **FALCON** takes the mystery out of vibration analysis via automatic configuration and diagnostic modules that guarantee both simplicity of set-up and unequalled reliability of results.
