AMADA EUROPE

PRESENTATION / KNOW-HOW

AMADA CORPORATE

Established in 1946 by Mr Isamu AMADA, today's associated group is composed of 80 companies and subsidiaries **all over the world**.

Originally dedicated to saws, his founder has pushed the company into an innovative direction through the manufacturing of machines designed **for the sheetmetal process**.

68 years later and **enriched with 3300 patents**, our staff has reached more than 8000 people.

In that respect, AMADA has turned out to be one of the worldwide leaders in this field of industry.

Such a success basically relies on main principles ruled out by Mr Amada:

- grow with our customers
- develop our creative human resource
- maintain a high technological level
- conduct our activities based on high ethics
- respect people through an environment-friendly approach

MARKETED PRODUCTS

BASED CLOSE TO CDG INTERNATIONAL AIRPORT, AMADA 2500 M² HEADQUARTERS HOST VIRTUALLY THE ENTIRE RANGE OF OUR MACHINERY, TOOLING AND FACTORY AUTOMATION WHICH CAN BE SEEN WORKING IN REAL TIME IN THIS UNIQUE AND PERMANENT SHOWROOM

FOL AJ FIBER LASER CUTTING MACHINE

PRESS BRAKE HG-ARS WITH AUTOMATIC TOOL CHANGER AND ROBOT

COMBINATION PUNCHING/FIBER LASER LC-2515 C1 AJ

NEW AND KEY PRODUCTS

Thanks to its precision and speed performance, the FOL AJ is the spearhead of AMADA's offer in terms of laser cutting.

The new HG ARs perfectly fit into the press brakes range of AMADA, now offering bending solutions ranging from the most manual to the most automated ones.

The LC-2515 C1 AJ joined the lineup of combination punching / laser (CO₂ or Fiber), which already includes referent machines such as ACIES, EM-L and LC-C1NT.
