# SMP TECHNIK

## PRESENTATION / KNOW-HOW

SMP TECHNIK has been created in 1947 and is a **multidisciplinary actor in the mechanical industry**. SMP designs and manufactures its own products: grinding center, rotary table, floating chuck. SMP can make prototypes, single parts, production and inspection fixtures. SMP is also a major actor in the engineering and mechanical subcontracting in the Defence and the Research industry as well as in any other sector needing engineering combined with high-precision machining.
