STTS

PRESENTATION / KNOW-HOW

STTS is well known for the quality of its soldering and brazing products.

With its **own technical department, specialized in brazing and soldering**, STTS has the expertise and experience to develop customized processes, **according to customers technical, environmental and budgetary requirements.**

S.T.T.S can propose a full range of brazing and soldering fluxes for :

- Aluminium alloys
- Copper and zinc alloys, tinning
- Electronic brazing
- Hard soldering and brazing
- The new generation of non CMR hard brazing
- Induction brazing
- The whole range of soldering fluxes for Battery manufacturing
- The manufacturing and the packaging of your fluxes under your own label
