FSH WELDING GROUP

PRESENTATION / KNOW-HOW

SELECTARC, company of the French industrial group FSH Welding Group, specialized in manufacturing and marketing of welding and brazing innovative consumables (brazing alloys, arc welding electrodes-MMA, GTAW rods and GMAW wires, FCW and scouring fluxes). Relying on two production plants in France and experience over two hundred years, **SELECTARC** offers one of the broadest ranges of products and services for all types of applications (energy, petrochemical, transportation, M & R, HVAC, wire drawing manufacturing...). The quality of its offer and its know-how, make the company a benchmark among the major players in the French industry and distribution network.

KNOW HOW

To manufacture welding consumables, the FSH Welding group implements specific skills.

Master of all manufacturing processes on their different phases:

- Technical knowledge in metallurgy and chemistry;
- Control of foundry techniques, drawing, extrusion / coating, scouring, marking, flagging;
- Quality system and product;
- Measurement and control;
- Packaging.

MARKETED PRODUCTS

Welding, brazing and gas cutting machines	1					
Covered stick electrodes		2				
Flux cored wires (FCAW)		2				
MIG/MAG/TIG (GMAW and GTAW) Wires & Rods		2				
Soldering filler materials			3			

BRANDS PORTFOLIO

1 SELECTARC

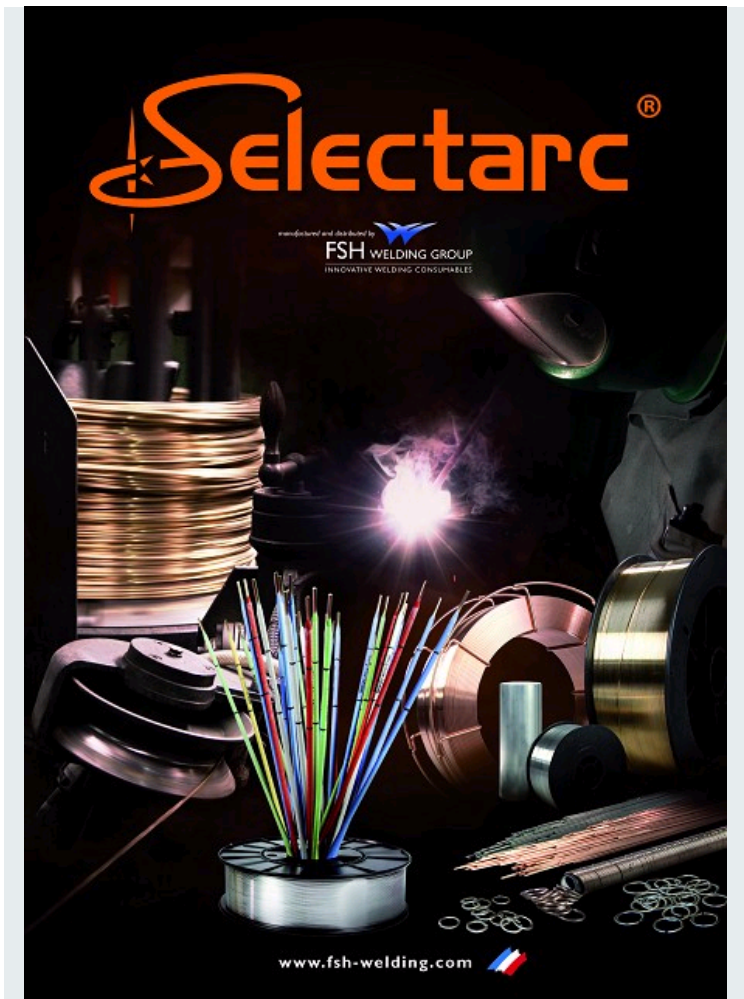

2 SELECTARC WELDING

3 SELECTARC BRAZING

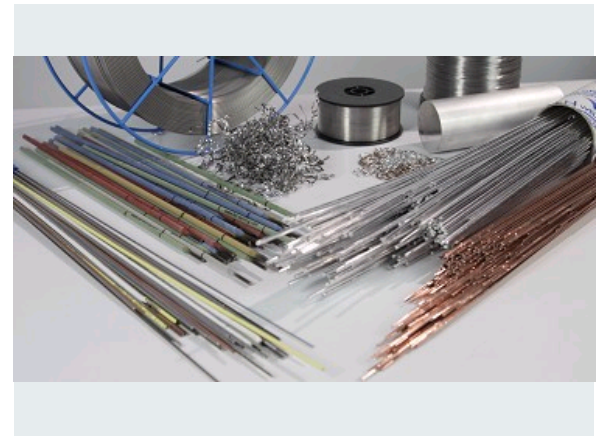

Solutions provider of welding and brazing specialties!

FSH WELDING GROUP

SOLUTIONS PROVIDER OF WELDING AND BRAZING SPECIALTIES

A FULL RANGE OF TECHNICAL WELDING & BRAZING CONSUMABLES

Selectarc®

BRAND SELECTARC

NEW AND KEY PRODUCTS

- **TBM Total Brazing Mix®**: a high-tech innovative industrial product, unique in the world, internationally patented for aluminum brazing.
- **TBW - Tubular Brazing Wire**: the ultimate major technical evolution recently developed in terms of product shape and process.
- **Full product range dedicated to the aerospace industry**
- **Selectarc Fonte Marine**: electrode with a "bimetal" core for welding cast iron, specially designed for the reconditioning of marine engine components.
- **Selectarc TIG F57N** : low alloyed TIG solid wire with 0,3%Cr specially designed for the nuclear industry to limit corrosion erosion.
