AIR PRODUCTS

PRESENTATION / KNOW-HOW

Air Products touches the lives of consumers around the globe in positive ways every day. With over 20,000 employees and operations in more than 50 countries, we serve customers across a wide range of industries from food and beverage, health and personal care to energy, transportation and semiconductors. We supply a unique portfolio of atmospheric gases, process and specialty gases, performance materials, equipment and services.

Air Products can provide a full range of high performance and industry standard gases for high quality welding and cutting production, giving better metal fabrication results no matter how demanding the application.

Our shielding gases range exceeds the requirements of all relevant gas quality and mix accuracy standards and includes all industry standard welding mixtures.

The Maxx[®] range of shielding gases has been designed following rigorous testing under real working conditions. Maxx[®] gases deliver the highest levels of performance - including better weld quality and faster welding speeds - to maximize productivity, reduce rejects and improve your working environment.

NEW AND KEY PRODUCTS

Ferromaxx® 7: The thin sheet specialist. It improves the weld quality and reduces rejects

Euromix M21: For MAG welding of carbon manganese steels and gas shielded flux cored arc welding (FCAW) and metal cored arc welding (MCAW) of carbon manganese steels and stainless steels

Inomaxx® TIG: The best gas for TIG stainless
