ALTIMET

PRESENTATION / KNOW-HOW

ALTIMET is considered as a **specialist in Surface Metrology, with prestigious International References.**

ALTIMET as manufacturer, ensures the development, assembly, sales and maintenance of its range of instruments...

ALTIMET is an **Expert Member Standardization of the Union of Mechanics Committee** whose work has enabled the development of the new **ISO standard 25178**. By mastering the integration of new optical technologies, by taking into account all parameters in the metrologic chain, by **innovating & adapting** our standard technology, we gain a **leading position in our market allowing us to serve our most demanding customers** in terms of research and industrial processes. Our location in the Rhône-Alpes region puts ALTIMET at the **heart of Micro-Mechanical, Watch and Nanotechnology Clusters.**

Our new agency opened in 2015 on the French side of Lake Geneva, about 30 minutes from Geneva International Airport, the extension of our structure with our headquarters and a new assembly plant on the Alpespace area near Grenoble, **strengthen our presence in the Europe and around the World.**

NEW AND KEY PRODUCTS

Altisurf50®, the first embedable technology in surface metrology.

This new module in **PheNIX®V2** allows now an **automatic and more faster** embedded surface metrology. Compact, connected to a 19 inch industrial rack, it performs opticals measurements in 2D or 3D, such as roughness and flatness, **according to the ISO 25178 standard**.
