# ATECMAA PACKAGING

## PRESENTATION / KNOW-HOW

Created in 1985, ATECMAA PACKAGING has become one of the French leading manufacturers of stretch wrapping machines with more than 7000 machines sold. As a manufacturer and designer of its machines, the company has filed several patents. Among them, some are **related to an innovating system in film stretching application**. This unique system is the only one which can wrap pallets loaded with very lightweight products in a condition of considerable height. The company also masters stretch wrapping technologies on both turntable machines and rotating arm machines.

The R&D team has recently launched a new range of stretch wrapping machines whose features are based on improving **workstation ergonomics, safety and productivity**. This new wide range of machines called GX range (semi-automatic range) adapts to the most various needs of users.

From a 2 control buttons machine (On/Off) to the ones managed thanks to a touchscreen control panel (adjustable settings for the different wrapping phases), ATECMAA PACKAGING gives the opportunity to have a **“tailor-made” wrapping**. Furthermore, the GX range already offers more than 20 optional functions or service packageable.

Full automatic stretch wrapping systems (LX range) represent also a special know-how: turntables and rotating arm machines and any types of conveyors. **A full array of options is integrated:** weighing, labeling, strapping with significant gains in productivity and of consumables.

Innovation is implemented with the creation of the middle range (called MX range) wrapping system: easy installation is combined with moderate cost and with the productivity of a full automatic wrapping line.

FULL TURNTABLE AUTOMATIC STRETCH WRAPPING SYSTEM, WITH LOAD STABILIZER AND APPLICATION OF THE TOP SHEET

ROTATING ARM WRAPPING MACHINE

AUTOMATIC, MULTI-OPTIONS MACHINE. TOUCHSCREEN AND REMOTE CONSOLE

FULLY AUTOMATED WRAPPING LINE. ROTATING ARM, ROLL CONTAINER ADAPTED

## NEW AND KEY PRODUCTS

Measuring the human factor associated risks to wrapping tasks, ATECMAA has been developing a range of ergonomic machines. They integrate a remote central console in series meant to improve the layout of the workstation and **keep the operator out of the danger area**. A loading system of the bobbin at an ergonomic height has also been studied in order to minimize any disorder of the musculoskeletal system. Furthermore, the stretch wrapping "Micro-lines" MX brings the opportunity of a **cost accessible "full automatic" system**.

## MAIN CUSTOMERS

LOGISTICS - FOOD - PHARMACEUTICAL - COSMETICS - WINE - TEXTILE - CHEMISTRY - INDUSTRY - TRADING - PLASTIC INDUSTRY
