

## TECHNIPAP ENGINEERING

### PRESENTATION / KNOW-HOW

Founded in 1991, TECHNIPAP Engineering is a **design, engineering and consulting company** serving the papermaking industry. Its team of engineers and management specialists offers to customers a full range of services including **process know-how, mechanical engineering and piping layout**. TECHNIPAP works with its clients through all the project steps, from general project concept definition to the start-up.

TECHNIPAP's **services**: process design, mechanical engineering, functional analysis, technical audits, technical specifications, consulting, procurement, assembly works supervision, project management & detail engineering, turn-key, commissioning, tests & start-up supervision, project review...

TECHNIPAP customers need highly qualified support in the field of project management. The company offers its customers a full range of engineering and consulting services. It possesses a large experience in paper machines equipment design and process dimensioning, as well in erection works and start-up supervision. TECHNIPAP is also able to realize **turn-key projects**. All services and studies, preliminary or detailed, are made within the company in order to **keep customer's projects confidential**. TECHNIPAP's team is able to realize project in French, English, Spanish or Russian which improves the close cooperation with both customers and OEMs.
