PRESENTATION / KNOW-HOW

AGV for logistic industrial solutions

French leader of **handling and automated storage by AGV** (Automated Guided Vehicle), BA Systèmes offers "turnkey" logistic solutions over the whole supply chain, from receipt of raw material to dispatch of finished products.

Over the last 40 years, BA Systèmes has been a leader in the field of industrial logistic systems using Automated Guided Vehicles (AGV). Specialized in automatic handling and storage, BA Systèmes is an expert in specific and complementary skills:

- Logistic analysis and **systems integration**
 - **AGV**: design and manufacturing
 - Development of **system control software**
 - **WMS (Warehouse Management Systems)** integration and marketing
- The mastery of these skills combined with a proactive spirit allow the company to offer and develop a comprehensive solution meeting the requirements of its customers' fields of activity. As such, BA Systèmes is recognized by economic agents and has a portfolio of very varied customers.

Based in Rennes (FR), BA Systèmes employs 220 people, half of whom are **executives and engineers**. The company is nowadays recognized in its field of activity with 300 installations across Europe.

NEW AND KEY PRODUCTS

Named GL 8.1, the latest addition to the range has been completely designed to meet the needs of logistics platforms. Firstly, thanks to its small dimensions, a width of only 800 mm, it is ideal for taking EURO pallets and skillfully introduced on shipping docks, in narrow aisles without requiring more space than a simple pallet. The diversity of flows encountered in logistics platforms creates a strong joint activity between operators, AGV and manual forklifts.
