PRESENTATION / KNOW-HOW

TEHPAP is the subsidiary of CENTRE TECHNIQUE DU PAPIER (CTP), one of the largest pulp and paper research center in Europe. TEHPAP provides online and laboratory equipments to **optimize the pulp and paper making processes**.

These instruments are jointly developed by CENTRE TECHNIQUE du PAPIER and Grenoble INP PAGORA school of engineering in France.

With **more than 30 years of experience** in the industry, TEHPAP develops **tailor made applications** with its products to the clients, and its representative network expands to all continents in the world.

NEW AND KEY PRODUCTS

TEHPAP's successful **On Line innovation PULP INSPECTOR** enables continuous on line monitoring of pulp, providing quick, dependable and repeatable data feedback in a cost effective way to meet the increasing demands in pulp production and use. Its modular design allows **many different measurements** according to the mill's needs: CSF, colour, fibers, dirt and shives, NIR...

3D STICK is a new method for macrostickies measurement. The device principle **is based on the determination of contaminant 3D morphology** and the **stickies identification by near infrared spectroscopy**. The information is richer and it is a "non contact" method.
