Packaging

## ARCIL

### PRESENTATION / KNOW-HOW

ARCIL is a French company designing and manufacturing packaging lines for the dairy food industry. Today, ARCIL is one of the worldwide leaders in the supply of ultra-clean machines with integrated thermoforming of cups (Form Fill Seal technology).

Since its creation, ARCIL has continuously brought revolutionary innovations with 3 main objectives to best serve its customers:

- **Offering a strong impact on the market in single cups or multi-packs** (example: possibility of mono or multi-flavors with big particles)
- **Minimum cost of ownership** (example: only 1 operator to drive the complete line, extra-long lifespan of the tools)
- **Maximum operational efficiency** (example: recipe changeover in less than 15 minutes)

Through its new engineering structure **Synerlink**, ARCIL and its partners offer an extensive range of solutions for primary, secondary and tertiary packaging, including in-mold labeling, product filling, over-wrapping, case packing and palletization for food or non-food packaging.

### MARKETED PRODUCTS

Maintenance services	1					
Services for machine erection	1					
Maintenance of machines	1					
Maintenance of tools / Tool sharpening	1					
Training centres	1					
Consultants	1	2	3			
Packaging Equipments	1			4	5	
Packaging in flexible or rigid materials	1			4	5	
Filling - dosing - weighing		2				
Package stacking and outside packing machines						6
Complete lines and special developments for packaging	1		3			
Complete lines for packaging	1		3			
Engineering (installing complete lines) for packaging			3
