PAKER

PRESENTATION / KNOW-HOW

Specialized in the **mechanization of cardboards** for 30 years, PAKER manufactures cardboard packaging machines - sleeving machines - grouping and cardboard wrapping machines - multipack machines - pick and place devices - robotized cells - integration of end of lines production.

The applications are essentially **for the dairy and drink industries**: glass and PET bottles, cans, jars, cups, trays...

According to customer needs, machines are available to run **between 40 and 450 packs/ minute**.

Machine specifications include ergonomic and stainless steel construction **with servo-drive**.
