STOPPIL

PRESENTATION / KNOW-HOW

STOPPIL is specialized in manufacturing filling, capping machines and complete automatic lines.

STOPPIL, well known as a **manufacturer of liquid and semi-liquid packaging machines** for many years, provides semi-automatic and 2 to 10 heads automatic in-line fillers.

Three counting technologies are being used: **volumetric, electromagnetic and mass flow meters.**

STOPPIL uses the best components for its production and offers a wide range of available options.

The company is acting **in many sectors**: food, chemicals, cosmetics, detergents, pharmaceuticals...

STOPPIL handles and developes for its customers **complete production lines**: bottle feeding, filling, capping, hotsealing, labelling, box filling and palletization.

MARKETED PRODUCTS

Packaging Equipments	1	2				
Packaging in flexible or rigid materials	1					
Filling - dosing - weighing	1					
Closing - sealing - encapsulation	1	2	3			
Finishing machines for packaging				4		
Package palletising					5	
Complete lines for packaging	1					
Engineering (installing complete lines) for packaging	1

NEW AND KEY PRODUCTS

Filling and capping monobloc for the pharmaceutical packaging industry **to produce E liquids for E cigarettes market**. Production of bottles from 10 mL to 100 mL with a filling speed up to 6.000 bottles/hour, fully electrical, meets the high hygienic standards of European pharmaceutical industry. Automatic or semi-automatic complete line.

2 to 10 heads in-line fillers with electromagnetic or mass flow meters. Diving nozzles monitored with servo motors, in order to **adapt the filling pipes upright movement speed according to the bottle shape**.

Proficiency and high volumes: up to 6000 b/ h.

Format flexibility without any tool (50 to 5000 ml as a standard), in site cleaning, measuring accuracy.

Multiformat in-line capping machine EB6600 **to screw any type of caps, pumps, sprays**. Torque control with servo motor. Follow up management of the controls of tightening torques.
