# ZALKIN

## PRESENTATION / KNOW-HOW

### A key player in capping technology

ZALKIN sends each year **some 350 capping machines** everywhere in the world. They are either free-standing or turrets to be integrated in monoblocs, for an average speed of 1,200 to 72,000 bottles per hour.

ZALKIN has developed a number of **innovative systems for a large variety of closures and containers** to assist its customers in the food and beverage, water, wine and spirits, chemical, cosmetics and pharmaceutical industries.

ZALKIN capping heads, the masterpieces of the machine, fitted with jaws or chucks are known for being the best in the market to seal, screw and push-on cylindrical and shaped closures. The company also provides decapping machines as well as a range of ancillary equipment including cap sorters, cap feed elevators, waterfall type elevators and cap conveyors.

ZALKIN dedicates significant resources to R&D to regularly develop new products. It has recently designed an In-line quality control system called "ZC LINE" enabling to extend its activities into a neighbouring market sector: **the quality control**. This modular control machine is to be integrated into bottling lines to simultaneously measure the removal torque, the bottle weight and the pressure level in the bottle.

**40 agents** dedicate their efforts to **promote ZALKIN** sales and technical assistance **throughout the world**. ZALKIN has some strong positions in places like France, North America, Germany and UK and is very active in Mexico where a branch office was opened in 2010. The company will very soon expand in Turkey, Brasil and China and later on in India, where room is seen for further development in these markets with strong potential.

## MARKETED PRODUCTS

Force and moment measurement	1					
Semi-automatic and automatic capping machines	1					
Screw capping machines	1					
Capping machines with steam injection	1					
Sealing machines	1					
Decapping machines	1					
Cap unscrambling hopper/cap elevator	1					
Custom made machines for packaging	1

## BRANDS PORTFOLIO

1 ZALKIN

FREE-STANDING SCREW CAPPING MACHINE

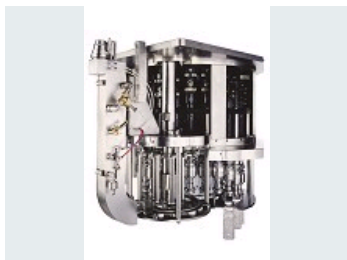

HYSTERESIS SCREW CAPPING HEAD

FREE-STANDING SEALING CAPPER

SINGLE-HEAD CAPPER FOR WINE INDUSTRY

SCREW CAPPING TURRET WITH STEAM INJECTION

CAPPER FOR PHARMACEUTICAL INDUSTRY

## NEW AND KEY PRODUCTS

### ZALKIN CAPPERS FOR DOSING PUMPS

#### Features

- head number: from 3 to 10
- PCD: from 480 to 720 mm
- maximum tube length: 250 mm

**High speed capper** thanks to the 2 integrated motors:

- one motor for the electronic cam
- one servomotor for the head

**Highly versatile capper for:**

- screw capping from 1 to X threads
- push-on & screw capping with indexing
- handling of pumps with nozzles, of triggers,...
- stability of the opening torques (whatever the capper output is)

## MAIN CUSTOMERS
